Description

Gmail is one of the most popular email service providers globally, developed and offered by Google. Known for its intuitive interface, robust security, and advanced features,

Features offered to users:

1. **Email Management:** Users can access, send, and manage their emails from a user-friendly and easy-to-use interface.
2. **Inbox Organization:** Gmail offers powerful inbox organization features, including labeling, filters, and categories, to help users keep their correspondence organized.
3. **Advanced Security:** With features such as spam filtering, phishing protection, and two-step authentication, Gmail ensures the security of electronic correspondence.
4. **Integration with other Google Services:** Users can benefit from integrating Gmail with other Google services such as Google Calendar, Google Drive, and Google Meet for a seamless collaboration and productivity experience.

Description

Features:

1. **Sign-in Functionality:** Users should be able to sign in to their Gmail accounts securely using their credentials.
2. **Sign-out Functionality:** Users should have the ability to sign out of their Gmail accounts when they're done using the application.
3. **User Authentication:** The module should incorporate robust authentication mechanisms to ensure the security of user accounts.
4. **Session Management:** Proper session management should be implemented to handle user sessions effectively, including automatic sign-out after a period of inactivity.
5. **User Feedback:** Clear and informative feedback messages should be provided to users during the sign-in and sign-out processes to guide them through the interaction.
